1.0 Introduction

Glen Schnarr & Associates Inc. (GSAI) has been retained by ARGO MAYFIELD WEST IV LIMITED to assist in obtaining the necessary planning approvals to facilitate the development of 1850 & 1890 Mayfield Road in the Town of Caledon (the ‘Subject Lands’ or ‘Site’) legally referred to as,

PART LOT 18 CONCESSION 3 WEST OF HURONTARIO STREET, (CHINGUACOUSY) AS IN RO912215; SAVE AND EXCEPT PARTS 1 AND 2, EXPROPRIATION PLAN PR4281022 SUBJECT TO AN EASEMENT AS IN CH27914 SUBJECT TO AN EASEMENT OVER PART LOT 18 CONCESSION 3 WEST OF HURONTARIO STREET, (CHINGUACOUSY) AS IN RO912215; DESIGNATED AS PART 3, EXPROPRIATION PLAN PR4281022 AS IN PR4281022 TOWN OF CALEDON

PT LT 18 CON 3 WHS CHINGUACOUSY AS IN RO1077766 SAVE AND EXCEPT PARTS 1 AND 2 ON EXPROPRIATION PLAN PR4281079 AS IN PR4281079; SUBJECT TO AN EASEMENT OVER PART 3 ON EXPROPRIATION PLAN PR4281079 AS IN PR4281079 TOWN OF CALEDON

The Subject Lands consist of two parcels and are generally located on the north side of Mayfield Road, west of Chinguacousy Road, in the Town of Caledon. See Section 2.0 of this Report for a detailed description of the Subject Lands.

The Subject Lands, together with adjacent lands, have been brought into the Region of Peel and Town of Caledon Settlement Area by way of the 2022 Region of Peel Official Plan and recently adopted Future Caledon Official Plan (2024). To advance the planning and development of the area, in November 2022, several landowners within the area bounded by the Highway 413 Corridor to the north and west, Chinguacousy Road to the east, and Mayfield Road to the south, assembled a Developers Group, named the Alloa Landowners Group. The Alloa Planning Area includes an area of approximately 750 hectares (1,850 acres) and has an estimated net developable area of approximately 600 hectares (1,500 acres).

The Subject Lands are located within the proposed Alloa Secondary Plan Area, which is subject to an active Official Plan Amendment application under file POPA 2024-0004 submitted July 5, 2024. Furthermore, the subject lands are located in the proposed Phase 1 Tertiary Plan area.

To implement the proposed Alloa Secondary Plan and Phase 1 Tertiary Plan, Applications for a Zoning By-law Amendment and Draft Plan of Subdivision are proposed to facilitate the development of the Subject Lands in accordance with the land uses generally proposed by the Secondary Plan.

The purpose of this report is to outline the nature of the proposed amendment and to evaluate the proposal in the context of the policies of the Provincial Planning Statement, the Region of Peel Official Plan, and the Town of Caledon Official Plan.

2.0 Site Description

The Subject Lands are generally located on the north side of Mayfield Road, west of Chinguacousy Road, see Figure 1 – Aerial Context. The Subject Lands has a combined area of approximately 8.566 hectares (21.17 acres) with a frontage of approximately 213.45 metres (700.3 feet). The lands are currently used for agricultural purposes.

The surrounding land uses are as follows:

- North: Agricultural activity with associated farming structures such as a farmhouse, barns and an existing watercourse.
- East: A new residential subdivision currently under construction containing single detached homes and townhouses.
- South: Two-storey single detached homes and two and three-storey townhouses.
- West: Agricultural activity with associated farming structures such as a farmhouse, barns and an existing watercourse.

The Subject Lands are also located north of the Mount Pleasant Secondary Plan Area in the City of Brampton. This Secondary Plan area is developed or currently under construction and expected to be largely built out in the next 2-3 years. On review, this Secondary Plan Area is based on complete community planning principles and has existing or planned sanitary and water service connections. The Subject Lands are also directly northeast of the future Heritage Heights Secondary Plan in the City of Brampton, which is not yet developed.

Further north and west of the Subject Lands is the Highway 413 Transportation Corridor which is the border of the proposed Alloo Secondary Plan.

Both parcels currently receive access from Mayfield Road. The proposed Draft Plan of Subdivision will introduce a new internal road network to the Subject Lands with connectivity to a new proposed collector road, Alexander Gillespie Avenue, east of the Subject Lands providing north-south access to Mayfield Road. More on the proposed subdivision in Section 3 of the report.

2.1 Transportation Network

The Subject Lands are north of Mayfield Road, which is classified as a Regional Arterial and extends east-west across the Region of Peel. The section of Mayfield Road between Chinguacousy Road and Mississauga Road is planned to be expanded from two to five lanes, with completion in 2027¹. The section of Mayfield Road between Chinguacousy Road and Hurontario Street is planned to be expanded from two lanes to six, with completion in 2025².

The Subject Lands are also located within close proximity to the planned Mayfield West Phase 2 Transit Hub, the existing Mount Pleasant GO Transit Station.

The Subject Lands are located close to Chinguacousy Road (Town Arterial). Chinguacousy Road is identified for expansion from two to four lanes by 2031³ and the Town of Caledon is currently undertaking a Schedule “C” Municipal Class Environmental Assessment for Chinguacousy Road in this area.

Through the design of both the Mayfield Road and Chinguacousy Road expansion projects, multi-use trails and pedestrian infrastructure are proposed along both roadways.

It is expected that as development along Mayfield Road continues, Mayfield Road will come to serve as a higher-order transit corridor capable of accommodating rapid transit service. In reviewing the type of public transit service available along other major east-west arterial roads in the Region (Bovaird Drive, Queen Street, Steeles Avenue), all provide existing Züm Bus Rapid Transit Service.

3.0 Draft Plan of Subdivision

As illustrated in the proposed Draft Plan of Subdivision, see **Figure 2: Draft Plan of Subdivision**, the proposed draft plan of subdivision proposes to develop the Subject Lands for medium-density housing options, in the form of townhouses. Additionally, a significant portion of the site will be dedicated to a Stormwater Management Pond, strategically positioned to manage drainage not only for the development itself but also for the surrounding areas. In the southwestern corner of the site, a block designated for Natural Environmental System (NES) compensation is being proposed, as negotiated with the CVC for a pre-existing feature on the property. The proposed draft plan of subdivision includes:

- 132 street townhouses within 25 block totaling 2.52 hectares (6.23 acres);
- One servicing block of 0.02 hectares (0.05 acres);
- One stormwater management pons block of 4.31 hectares (10.65 acres);
- One NES compensation block of 0.39 hectares (0.96 acres);
- Road widening blocks totaling 0.11 hectares (0.27 acres);
- Reserve blocks totaling 0.01 hectares (0.02 acres); and

¹ Region of Peel Capital Project #22262

² Region of Peel Capital Project #55247

³ Mayfield West Phase 2 Stage 2 Transportation Assessment (Paradigm Transportation Solutions, January 2018)

- Internal road networks totaling 1.24 hectares (2.8 acres);

The following provides an overview of key elements of the Draft Plan of Subdivision:

Street Townhouse Blocks

A total of 25 Street Townhouse Blocks are being proposed, comprising 132 residential units. The townhomes are generally located on the southwest corner of Alexander Gillespie Avenue (new collector road) and Welsh Avenue, this placement will enhance the accessibility of the units to Mayfield Road. These townhouses will be developed on individual lots with direct access to a street. Each street townhouse will generally have two parking spaces, one in an attached garage and another in the driveway. Private outdoor amenity space will be provided by way of a rear yard for each lot.

Stormwater Management Pond Block

A large Stormwater Management Pond Block is being proposed on the northwest corner of Alexander Gillespie Avenue and Mayfield Road. This Stormwater Management Pond Block will take up a significant portion of the subject lands but will ultimately provide crucial drainage infrastructure to this draft plan of subdivision as well as surrounding draft plans.

NES Compensation Block

Located in the southwest corner of the subject lands is a proposed NES Compensation Block. This portion of land was negotiated with the CVC for a pre-existing feature on the property.

Road Network

The proposed Draft Plan of Subdivision includes an internal public street network that aligns with the street network proposed in the Tertiary Plan.

The subdivision features a well-planned internal road network that ensures logical traffic flow throughout. All local roads will have widths of 18m and provide sidewalks on both sides as required by the ATMP.

Servicing Block

A Servicing Block is required to provide a connection to the proposed stormwater management pond block.

4.0 Zoning By-law Amendment

The Town of Caledon passed By-law No. 2024-050 on June 25, 2024 to rezone the subject lands among other by-laws and various other lands in Caledon in an effort to promote the achievement of the Town's Housing Pledge. The approved zoning generally allows for a wide range of community uses, including environmental conservation. The subject lands are zoned as provided in the Town of Caledon Zoning By-law 2006-50.

- **RMD-686-H39A-H39B** (Mixed Density Residential-Special Exception 686 -Holding Provision 39A - Holding Provision - 39B); and
- **EPA1-H39A-H39B** (Environmental Policy Area One - Holding Provision 39A - Holding Provision 39B)

The applicant is proposing to generally maintain the existing zones, with the exception of two minor revisions to the RMD-686 zone. These revisions are requested to facilitate a more efficient delivery of housing units. No revisions are proposed to the EPA1 zone.

A summary of the revisions is provided below:

- Permitted Encroachment into a required Front Yard for a bay, bow or box window with or without foundation or cold cellar is revised from 1 metre to two metres (provided a setback of 0.5 metres is maintained to the front lot line. This encroachment is consistent with existing front yard encroachments in the same zone (for covered or uncovered porch or balcony, terrace, canopy or portico, including stairs or steps).
- Permitted Encroachment into a required Rear Yard is revised to permit 3.5 metres (up to a maximum width of 60% of the lot) for a one-storey component of a main building. This standard previously restricted the same encroachment to one storey components of main buildings at lot depths less than 24 metres.

The proposed Zoning By-law Amendment will implement the proposed Draft Plan of Subdivision, while continuing to achieve the goals and objectives of the Town of Caledon Official Plan, and draft Alloo Secondary Plan.

5.0 Consultation Process

A Pre-Application Review Committee (PARC) meeting was held with the Town of Caledon on July 11, 2024. Town of Caledon Staff, Region of Peel Staff, members of Argo Mayfield West IV Limited, and GSAI were in attendance. At the meeting, requirements for a complete development submission were discussed. The required studies and reports prepared in support of this complete development submission are detailed in Section 6.0 below.

Notice of Application

The public engagement process will follow the public notification and engagement procedures as prescribed by the *Planning Act* and guided by the Official Plan. Notice of Application will be placed in the Caledon Enterprise, Caledon Citizen and Brampton Guardian. In addition, the Notice will be mailed to all landowners within 120 m (393.7 ft) and placed on the Town's website. A Development Notice will also be posted on the property.

Agency and Department Review

The application will be circulated to external agencies and internal departments for review and comment.

Public Meeting

A public meeting will be scheduled by the Town as required by the Planning Act after submission. This will provide any member of the public the opportunity to make representations in respect of the current proposal. This application follows closely on the submission of the Alloa Secondary Plan and Phase 1 Tertiary Plan. The grouping of these public meetings might be beneficial for staff and the public to have a holistic discussion. Any relevant concerns raised during the Public Meeting(s) for the aforementioned applications can be addressed during the review cycle of this application.

5.1 Indigenous Consultation Process

In support of the Secondary Plan, the Alloa Landowners Group is in the process of engaging with Indigenous Nations and Communities, as informed by the Town of Caledon's "Expectations for Indigenous Engagement for Proponent Led Development". The purpose of engagement is to follow the Duty to Consult and provide information about the Proposed Development, including circulation of supporting materials. Engagement is planned with the following relevant Indigenous Nations and Communities: Mississaugas of the Credit First Nation; Six Nations of the Grand River; Huron-Wendat Nation; Haudenosaunee Confederacy of Chiefs (as represented by the Haudenosaunee Development Institute); and Métis Nation of Ontario (Region 8).

Initial correspondence with the relevant Indigenous Nation/Communities included a description of the project, location figures, anticipated impact of the project, and a list of studies complete or underway. Follow-up correspondence is anticipated, including circulation of requested material. All engagements will be documented and shared with the Town of Caledon through future stages of the related Secondary Plan process.

6.0 Supportive Studies and Reports

Per communication with Town staff and the requirements of the Official Plan, the below technical studies and reports have been prepared in support of the proposed Draft Plan of Subdivision and Zoning By-law Amendment, as discussed below.

6.1 Arborist Report and Tree Preservation Plan

Crozier was engaged to prepare an Arborist Report and Tree Preservation Plan, which involved the inventory and assessment of 81 individual trees and two tree groupings during the fieldwork. All 81 individual trees, along with portions of the two tree groupings, are proposed for removal. However, trees located on neighboring properties are intended to be preserved. The majority of the assessed trees are in good to fair condition and, in accordance with the Town of Caledon's compensation ratios, will be replaced with 118 compensation trees. Trees identified as being in poor health or dead are recommended for removal due to their condition. The recommendations for tree retention are based on the concept draft plan of subdivision, as well as an evaluation of tree health, with a commitment to implementing best practices throughout the construction process.

6.2 Archaeological Assessment

Parslow Heritage Consultancy Inc. (PHC) conducted a Stage 2 archaeological assessment for lands located at 1850 and 1890 Mayfield Road, Caledon, Ontario, as part of a Draft Plan of Subdivision application under the Planning Act. The 8.7-hectare study area, consisting of agricultural land and a small woodlot, had prior disturbances from the demolition and grading of former house lots visible in historical aerial imagery. The assessment followed a Stage 1 recommendation to evaluate archaeological potential within the Alloa Secondary Plan Area. Fieldwork, conducted between November 7th and 13th, 2024, involved test-pit surveys at 5-meter intervals in non-agricultural areas and pedestrian surveys at 5-meter and 2-meter intervals in ploughed agricultural lands, adhering to Ministry of Culture and Media (MCM) standards. Disturbances such as poorly drained areas, previously graded sections, and a Natural Heritage System (NHS) compensation area were documented, but no archaeological materials were encountered during the surveys.

The assessment concluded that portions of the site surveyed through pedestrian and test-pit methods are clear of archaeological resources and do not require further investigation. Stage 3 assessment is not recommended for these areas. However, the NHS compensation area in the southwestern corner retains archaeological potential and will require a Stage 2 assessment if future development plans involve below-grade impacts in this area. PHC recommended entering this report into the Ontario Public Register of Archaeological Reports under the Ontario Heritage Act. These findings ensure compliance with regulatory standards while supporting the proposed development within the study area.

6.3 Environmental Implementation Report / Environmental Impact Study

Crozier Consulting Engineers (Crozier) was retained by the Alloa Landowners Group to coordinate and prepare an Environmental Impact Report (EIR) in support of the Phase 1 Tertiary Plan and associated future Draft Plans of Subdivision and site plans. Additionally, owing to the scale of the study area, a larger Consultant team was retained which includes Urbantech (civil and water resources engineering), GEO Morphix Ltd. (fluvial geomorphology), Azimuth Environmental Consulting Inc. (Azimuth) and Cunningham Environmental Associates (Cunningham) (wildlife, fisheries, and terrestrial), Pratus Group (climate adaptation) and Crozier

(hydrogeology). This EIR adheres to the Provincial Policy Statement, Region of Peel and Town of Caledon Official Plans, and relevant TRCA/CVC regulations

The purpose of the EIR is to provide a description and background review of the physical and ecological characteristics of natural heritage features from the subject and adjacent lands including ecological functions, significance, and sensitivity. Additionally, the EIR provides an overview of servicing and stormwater management strategies for the Alloa Phase 1 lands.

Crozier and the Consultant team concluded through their analysis that:

- All significant natural heritage features have been identified and confirmed jointly by TRCA, CVC, Town of Caledon and Project Team members. These features have been protected and associated buffers applied.
- Through restored buffers and the proposed transformation of the degraded Alloa Drain into a significant greenway corridor, the Alloa Phase 1 Tertiary Plan has created a significant opportunity for the expansion of the Natural Heritage System.
- The Alloa Phase 1 Tertiary Plan has achieved a net benefit to the existing habitat by adding significant vegetation cover/diversity and resulting net gain to Performance Measure targets.
- It is recommended that additional studies may be required and/or a scoped EIS be completed where any significant changes to Alloa Phase 1 Tertiary Plan have resulted since the completion of this report. The requirement for any additional study shall be determined by the Town of Caledon in consultation with the relevant agency(s).
- Agencies and the Project Team should continue to collaborate to align development with the Tertiary Plan's objectives and policies. This includes coordinating efforts in civil and water resources engineering, fluvial geomorphology, terrestrial and fisheries management, climate adaptation, and hydrogeology.

6.4 Environmental Site Assessment

DS conducted a Phase One Environmental Site Assessment (ESA) for the properties located at 1850 and 1890 Mayfield Road in Caledon, Ontario. This Phase One ESA was performed per the intent, methodology, and practices outlined in Ontario Regulation 153/04 (as amended). The primary objective was to identify any potentially contaminating activities (PCAs) on the subject property and within the study area, and to assess whether these PCAs could result in Areas of Potential Environmental Concern (APECs) on the property.

As a result of this investigation, eight PCAs were identified within the study area, which is contributing to three APECs located on, in, or under the Phase One Property.

The Phase Two ESA was conducted concurrently with a geotechnical investigation. The geotechnical study included the advancement of eight boreholes to a maximum depth of 6.7 meters below ground surface (mbgs) between July 8 and 9, 2024. An additional environmental investigation included the drilling of 11 shallow boreholes to a depth of 0.5 mbgs on July 18, 2024, under DS personnel's supervision. Furthermore, three additional boreholes were hand-augured to a depth of 0.5 mbgs. Groundwater monitoring wells were installed in four of the boreholes to assess groundwater flow direction. The borehole locations were determined based on the findings of the

Phase One ESA, and all identified APECs were thoroughly investigated with boreholes per the requirements of Ontario Regulation 153/04 (as amended). Soil samples were collected and analyzed for all potential contaminants of concern (PCOCs), including metals, arsenic (As), antimony (Sb), selenium (Se), boron (B-HWS), cyanide (CN-), chromium (VI), mercury (Hg), pH, electrical conductivity (EC), sodium adsorption ratio (SAR), petroleum hydrocarbons (PHCs), volatile organic compounds (VOCs), and polycyclic aromatic hydrocarbons (PAHs).

The analytical results for the soil samples were compared to the "Table 2: Full Depth Generic Site Condition Standards for Residential/Parkland/Institutional Use," as outlined in the MECP document, "Soil, Ground Water and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act" dated April 15, 2011. The comparison was made for medium and fine-textured soils applicable to residential/parkland/institutional property use.

Based on a review of the Phase Two ESA findings, DS has drawn the following conclusions and recommendations:

- The chemical analyses conducted on the soil and groundwater samples indicate that the applicable Site Condition Standards have been met.
- Based on these findings, a Record of Site Condition may be filed for the Phase Two Property.
- All monitoring wells should be decommissioned in accordance with Ontario Regulation 903 once they are no longer required.

6.5 Functional Services Report and Stormwater Management Report

Urbantech was retained to conduct a Functional Services Report (FSR) and Stormwater Management Report. The FSR and Stormwater Management Report was submitted as part of the Phase 1 Tertiary Plan submission. As part of this submission, Urbantech has prepared letters of compliance for the proposed Draft Plan of Subdivision and Zoning By-law Amendment. These letters confirm that the development proposal will comply with the recommendations and servicing concepts described in the Alloo Tertiary Plan – Phase 1 Functional Servicing Report (September 2024). The letters of compliance attached as part of the submission package include a Storm Servicing Plan, a Sanitary Drainage Plan and a Water Servicing Plan.

6.6 Geotechnical Report

DS Consultants Ltd. was retained to undertake a preliminary geotechnical investigation. A total of eight (8) boreholes were drilled to a depth of 6.7 m below existing grade. Groundwater level observations were also made during drilling and in the open boreholes at the completion of the drilling operations. Monitoring wells of 50 mm diameter were installed in four (4) boreholes (to allow for groundwater level monitoring and potential hydrogeological testing/study).

Please refer to the Geotechnical Report submitted with the application package for a detailed discussion and recommendations.

6.7 Healthy Development Assessment

The Region of Peel Healthy Development Assessment was prepared in support of the Draft Plan of Subdivision by NAK Design Strategies. NAK Design Strategies has prepared a Healthy Development Assessment (HDA) to support the Alloo Secondary Plan. The HDA confirms that the development will emphasize sustainability and active transportation. The HDA evaluated how the Alloo Secondary Plan development contributes to fostering health-promoting communities. The Secondary Plan achieves a gold score of 57/60, or 95%.

6.8 Hydrogeological Study

A Hydrogeological Investigation by DS Consultants Ltd. was prepared to provide an overview of the existing geological and hydrogeological conditions for the Subject Lands and an assessment of the hydrogeological constraints and impacts of the proposed development on local groundwater and surface water features and was submitted as part of the Secondary Plan. The investigation also provides an estimation of construction dewatering for conceptual structures that extend into the water table. A water balance assessment was completed including pre- and post-development predictions on overall effects on the hydrologic function of the Site. The water balance provides support for overall servicing and the integration of Low Impact Development (LID) measures. A Wetland Water Balance Risk Evaluation was completed to assess potential risks to retained wetlands as a result of the development.

6.9 Noise Study

Valcoustics Canada Ltd. (VCL) was retained to prepare an Environmental Noise Feasibility Study for the Subject Lands. The transportation noise source with the potential for impact at the subject site is road traffic on Chinguacousy Road, Mayfield Road and the internal roadways (Welsh Avenue and Alexander Gillespie Avenue). There are no stationary noise sources in the vicinity with the potential for impact at the subject site.

To meet the noise guideline limits the following recommendations are made:

- The provision for adding air conditioning is required at the townhouse blocks adjacent to Welsh Avenue, Alexander Gillespie Avenue, and the stormwater management pond (Blocks 3, 4, 9, 10, 13 to 16, 21 to 25).
- Sound barriers are required (see Figure 2 in the supporting study):
 - o 2.2 m high at the easternmost townhouse unit in Block 22 (adjacent to Alexander Gillespie Avenue and backing toward Mayfield Road);
 - o 1.8 m high at:
 - All units in Blocks 23 to 25 and the remaining units in Block 22 (backing toward Mayfield Road);
 - The northernmost units in Block 3, 4, 9, and 10 (adjacent to Welsh Avenue);
 - The easternmost units in Blocks 15 and 16 (adjacent to Alexander Gillespie Avenue).

- Exterior wall and window construction meeting the minimum non-acoustical requirements of the Ontario Building Code (OBC) will be sufficient to meet the indoor noise criteria at all residential blocks.

-
For more detail, please refer to the Environmental Noise Feasibility Study submitted as part of the application package.

6.10 Traffic/Transportation Impact Study, Parking Plan and Pedestrian Circulation Plan

A Transportation Impact Study (TIS) (Crozier, October 2024) was prepared in support of the Alloa Phase 1 Tertiary Plan. The TIS comprehensively evaluated the impacts of Alloa Phase 1 Lands from a transportation perspective, identifying required mitigation measures as warranted. The Tertiary Plan was designed to comprise the intended individual Draft Plans such that the Tertiary Plan's road network and land use layout were reflective of the respective Draft Plans for each parcel.

Crozier has prepared a letter a Transportation Compliance Letter in support of the development proposal on the Subject Land. This letter confirms that the proposed Draft Plan of Subdivision can be aligned with the findings and recommendations of the TIS submitted for the Alloa Tertiary Plan.

6.11 Waste Management Plan

A Waste Management Plan has been prepared and was submitted as part of the submission package. This plan illustrates that the subdivision will comply with the Waste Collection Design Standards Manual.

The Waste Management Plan illustrates the sufficient turning radius and width for all streets.

6.12 Housing Assessment

A Housing Assessment has been prepared in support of the Alloa Secondary Plan by GSAI. The Housing Assessment states that the Alloa Secondary Plan will have an expected population of approximately 40,000 people, within 14,000 residential dwelling units, and an estimated density of 90 residents and jobs per hectare.

Proposed Development

The proposed draft plan of subdivision is expected to accommodate a diverse population, reflecting the growing housing demand in both the Greater Toronto Area (GTA) and the Town of Caledon.

The need for larger, family-oriented units has increased significantly across the GTA, including in Caledon, driven by demographic trends such as population growth and shifting household preferences. The proposed plan responds to this trend by providing larger units.

The draft plan has been carefully designed to provide housing options focusing on ground-orientated housing products, offering flexibility in terms of tenure (rental and ownership), built form, unit size, and pricing. This housing product is intended to accommodate a wide range of future residents, including families, singles, and seniors. The range of permitted residential forms includes various types of townhouses (such as traditional, stacked, and back-to-back). This assortment ensures that households of different sizes, including larger families, will have access to suitable housing.

| Draft Plan Unit and Population Estimate | | | | |
|--|--------------------------|-------------------|------------------------|-------------------|
| | Units Per Hectare | # of Units | PPU⁴ | Population |
| Total Population | | 132 | - | 435.6 |
| Residential Area: Medium Density | 60 | 132 | 3.3 | 435.6 |

The need for larger family-oriented units and housing has increased over the GTA and within the Town of Caledon. As seen in the proposed unit mix in the table below the proposed draft plan strikes an excellent balance in the housing mix being provided.

The development proposal when considered in a broader community context aligns with the Town of Caledon’s vision to deliver a well-balanced community with housing options for households at various life stages and income levels. This development will enhance housing choice, help address regional housing pressures, and contribute to building a vibrant, inclusive community.

Affordability

On May 1, 2024, the Province of Ontario released the 2024 Affordable Residential Units Bulletin, a key policy document outlining the thresholds that define housing affordability across the province. The bulletin distinguishes between market-based thresholds and income-based thresholds to assess the affordability of residential units. These benchmarks are applied across various housing types, serving as a critical reference for municipalities, including the Town of Caledon, in their efforts to plan and regulate housing development.

While it has not yet been formally determined whether any specific units in this project will meet the official definition of “affordable” under the new thresholds, the proposal aims to broaden the spectrum of housing choices to the broader community. The inclusion of street townhouses in the proposed development is motivated by their ability to provide an attractive and attainable housing option for families and individuals seeking homeownership. Street townhouses, which feature individual front entrances and direct access to public streets, offer many of the benefits of single-detached homes—such as private outdoor spaces and a sense of ownership—while remaining more affordable.

⁴ Draft 2024 Town of Caledon Development Charges Background Study

These units are more cost-effective to develop due to their narrower lots and shared walls, which reduce land and construction expenses. Street townhouses also make efficient use of infrastructure, distributing servicing costs across multiple units, which helps keep overall housing prices lower. This typology is ideal for growing households, first-time buyers, and those seeking a balance between affordability and a traditional neighborhood feel. By offering street townhouses, the development ensures a range of housing options that promote inclusivity and support long-term affordability within the community.

This proposed housing type when evaluated in the context of the Alloo Secondary Plan aligns with the Town of Caledon's long-term urban planning objectives and the Province's emphasis on housing affordability and inclusivity. By prioritizing a mix of unit types, the project reflects a progressive planning approach that supports a variety of lifestyles and income levels. These efforts will enhance the availability of more attainable housing options, contributing to the broader policy goals of addressing the housing affordability crisis across Ontario.

Planning Rational

This Assessment provides an overview and analysis of the relevant Provincial, Regional, and local housing-related policy framework that applies to the Draft Plan of Subdivision, including the Provincial Planning Statement (2024), the Region of Peel Official Plan (2022), the Future Caledon Official Plan (2024).

Provincial Policy Statement (2024)

The Provincial Planning Statement, 2024 (PPS 2024) sets out guiding principles and policies to support long-term success and improve the quality of life for all Ontarians. The following sections of the PPS 2024 provide the framework that supports this proposal:

Section 2.1 Planning for People and Homes

The proposed development advances complete communities by providing a mix of housing types, including single-detached, townhomes, and multi-residential units, accommodating diverse needs (age groups, family sizes, and income levels). Promoting walkable neighbourhoods that integrate residential, and recreational uses. Supporting proximity to services such as schools, parks, and transit, which contributes to a high quality of life and access to daily needs within close distances.

Section 2.2 Housing

The development responds directly to the policy direction that municipalities maintain a sufficient supply and mix of housing options to meet projected demand. The development proposal provides a range of market-based housing, meeting the needs of diverse socio-economic groups, consistent with PPS 2024 goals for inclusivity and housing accessibility. The development aligns with the need for compact and efficient growth through higher-density zoning provisions and encourages intensification where services are already available, minimizing urban sprawl. By providing a range of unit types and sizes the market will automatically provide units that are more affordable to some. The exact location of exclusively affordable housing has not been determined and will possibly be confirmed during the secondary plan process.

Section 2.9 Energy Conservation, Air Quality and Climate Change

The proposal prioritizes energy-efficient building practices and climate-resilient design. Encouraging green building technologies and low-impact development (LID) features to manage stormwater and reduce environmental impacts where feasible and possible. Integrating parkland and green spaces, fostering natural stormwater absorption, and contributing to community well-being.

Section 3 Infrastructure and Public Facilities Overview

The subdivision ensures that infrastructure and public service facilities are planned for in a sustainable, cost-effective, and coordinated manner.

Region of Peel Official Plan (2022)

There are several policies that guide housing development that are applicable.

5.4.8 *To support planning for complete communities in Peel that are compact, well designed, transit-supportive, offer transportation choices, include a diverse mix of land uses, accommodate people at all stages of life and have an appropriate mix of housing, a good range of jobs, high quality open space, and easy access to retail and services to meet daily needs.*

5.6.19.5 *Support a mix of multi-unit housing, including affordable housing, rental housing and additional residential units, as appropriate.*

5.6.20.14.8 *To ensure development in the 2051 New Urban Area supports a range and mix of housing options and densities, including additional residential units and affordable housing, to serve all sizes, incomes, and ages of households.*

5.9.7 *Collaborate with the local municipalities to plan for an appropriate range and mix of housing options and densities by implementing Peel-wide new housing unit targets shown in Table 4.*

| <i>Target Area</i> | <i>Targets</i> |
|----------------------|---|
| <i>Affordability</i> | <i>That 30% of all new housing units are affordable housing, of which 50% of all affordable housing units are encouraged to be affordable to low income households.</i> |
| <i>Rental</i> | <i>That 25% of all new housing units are rental tenure.</i> |
| <i>Density</i> | <i>That 50% of all new housing units are in forms other than detached and semi-detached houses.</i> |

5.9.13 *Collaborate with the local municipalities to provide a range of unit sizes in new multiunit residential developments, including the provision of two or more bedroom*

family-sized units. The proportion of unit types may vary over time and shall align with housing need as identified through Regional and local municipal strategies, planning approval processes, needs assessments, and market studies.

5.9.27 *Collaborate with the local municipalities and other stakeholders such as the conservation authorities, the building and development industry, and landowners to encourage new residential development, redevelopment, and intensification in support of Regional and local municipal official plan policies promoting compact built forms of development and residential intensification.*

5.9.36 *Seek opportunities to provide an appropriate range and mix of housing options and densities, including affordable housing, that utilize existing stock.*

5.9.51 *Collaborate with the local municipalities to develop options to provide opportunities to meet the housing needs of diverse populations.*

As per the Housing Assessment submitted in support of the Secondary Plan, the Draft Plan of Subdivision intends to contribute to a complete community that provides accessibility to multiple land uses and needs for future residents in the 2051 New Urban Area. As such a diverse range of ground-orientated housing options is proposed, including accommodation for multi-unit, affordable, and possible secondary and accessory units. The Draft Plan of Subdivision further intends to provide a range of unit sizes that are suitable for larger households and families, which may include two or more bedroom units.

Future Caledon Official Plan (2024)

A Guiding Principle of the Future Caledon Official Plan is to *Address housing affordability and foster the development of various forms of affordable housing options throughout the Town.* The following additional housing policies apply:

9.2.6 *To support the diversification of the housing stock, the Town will work with the Region to:*

- a) achieve a target of 50 percent of all new residential units to be in a form other than detached and semi-detached housing in strategic growth areas identified in Part B and identified as major transit station areas on Schedule C1, Town-wide Transportation Network, of this Plan;*
- b) development containing more than 50 new residential units is encouraged to include 50 percent of a mix of two-bedroom units and three-bedroom units to achieve a balanced mix of unit types and sizes and support the creation of housing suitable for families;*
- c) encourage a mix of unit sizes in all new residential developments to accommodate diverse households; and,*
- d) consider flexible, innovative housing types and tenures.*

9.2.7 *All proposed housing developments will be subject to review based on the Green Development Standards established in accordance with Section 5.4 of this Plan.*

9.2.8 *The Town will require a housing assessment in support of a development application proposing more than 50 dwelling units. The housing assessment will be prepared by the applicant as part of a complete application and will demonstrate conformity with the housing objectives, targets and policies in the Region of Peel Official Plan and this Plan, including:*

- a) contributions made to all housing targets identified by the Town and Region;*
- b) the availability of an appropriate range and mix of housing types, densities, sizes, and tenure that contribute to the supply of affordable housing;*
- c) identification and conveyance strategy for affordable housing in consultation with the Region of Peel; and,*
- d) where the proposed development is contributing toward supportive, shared, or residential care units, demonstrate the contributions towards universal accessibility objectives.*

9.3.1 *The Town will allow a diverse range of housing in all residential and mixed-use areas to support the supply of relatively affordable missing middle housing options.*

The Future Caledon Official Plan defines missing middle as a range of housing types between detached dwellings and mid-rise apartment buildings that were more common before World War II. It includes additional residential units, multiple-attached dwellings, multiplexes and low rise apartment buildings. The inclusion of townhouse products is aimed at providing additional missing middle housing as per the Official Plan. The development proposal is motivated by the need to offer a well-rounded housing mix that accommodates diverse lifestyle preferences and market demands. While traditionally seen as more expensive, single-detached homes can play a role in promoting affordability when integrated thoughtfully within a larger development.

9.4.1 *To support the diversification of housing tenure, the Town will work with the Region to implement the target that a minimum of 25 percent of all new housing developments be purpose built rental housing.*

9.4.4 *The Town will encourage the provision of rental housing in appropriate mixed-use developments in strategic growth areas, transitional areas, and employment land where conversion/redevelopment is supported.*

9.4.5 *The Town will encourage the provision of live-work opportunities including business or personal services, office uses and home occupations in new multi-unit residential developments, in accordance with the policies of this Plan.*

- 9.8.1 *The Town will work toward achieving the Regional goal of 30 percent of all new housing units meeting the threshold of affordable housing. Further, affordable housing thresholds for low- and moderate-income households will be updated in accordance with Provincial policy.*
- 9.8.1 *The Town will work toward achieving the Regional goal of 30 percent of all new housing units meeting the threshold of affordable housing. Further, affordable housing thresholds for low- and moderate-income households will be updated in accordance with Provincial policy.*
- 9.8.4 *A balanced geographical distribution of affordable housing, including non-profit or assisted supportive housing, will be encouraged with an emphasis on placement near transit-supportive locations.*

The Draft Plan aligns with the guiding principle of the Secondary Plan noted above. As discussed in Section 3.1 of this Assessment, the Secondary Plan has set targets for affordable housing, rental tenure, and built form in conformity with the Future Caledon Official Plan. The Draft Plan intends to provide ownership and opportunities for rental tenure, built form options, and a variety of pricing to accommodate future residents across their respective incomes, ages, and lifestyle. Affordable units and rental units are not yet identified for a specific area within the Draft Plan, and these details are anticipated in subsequent development planning applications for individual parcels or to be determined in consultation with the Town and/or Region through the review process of the Secondary Plan.

The Secondary Plan permits residential uses, including affordable and rental units, across a net residential area of approximately 217.5 hectares (537.5 acres). The highest densities are anticipated in mixed-use areas, especially where near existing or planned public transit infrastructure, such as in Special Policy Area 1. The mixed-use areas will additionally permit a broad range of uses, including live-work opportunities in multi-unit developments.

This Assessment has been prepared in conformity with Section 9.2.8 of the Future Caledon Official Plan. New development in the Secondary Plan will meet the Town of Caledon's Green Development Standards, as best as practical, including for energy efficiency and low carbon building design. A Green Development Standards assessment has been completed and was submitted as part of the submission package.

7.0 Policy Context

The following sections provide a review and analysis of the applicable Provincial, Regional, and Municipal policies and regulations. The following statutory documents have been reviewed:

- Planning Act;
- Provincial Policy Statement, 2024;
- Peel Regional Official Plan;
- Future Caledon Official Plan; and,
- Town of Caledon Zoning By-law.

7.1 Planning Act, R.S.O 1990 c.P . 13

Section 2 of the Planning Act sets out matters of provincial interest as it pertains to land use and requires that municipal councils have regard to these in all decision making. Section 2 sets out the following matters of Provincial interest to be addressed:

(2) The Minister, the council of a municipality... in carrying out its responsibilities under this Act, shall have regard to... matters of provincial interest such as:

(f) the adequate provision and efficient use of communication, transportation, sewage and water services and waste management systems;

(h) the orderly development of safe and healthy communities;

(h.1) the accessibility for persons with disabilities to all facilities, services and matters to which this Act applies;

(j) the adequate provision of a full range of housing, including affordable housing;

(p) the appropriate location of growth and development;

(r) the promotion of built form that,

(i) is well-designed,

(ii) encourages a sense of place, and

(iii) provides for public spaces that are of high quality, safe, accessible, attractive and vibrant.

Based on a review of Section 2 of the Planning Act, the approval of the proposed development would not conflict with the above-mentioned matters of provincial interest. Other matters of provincial interest identified in Section 2 of the Planning Act are not relevant to this application. This report has thoroughly addressed adherence to the applicable matters. Therefore, we are of the opinion that the proposed Amendments appropriately consider the matters of provincial interest as stipulated by the Planning Act.

7.2 Provincial Planning Statement (2024)

The Provincial Planning Statement was issued under section 3 of the Planning Act and came into effect on October 20, 2024. It replaces the Provincial Planning Statement that came into effect on May 1, 2020.

The Provincial Planning Statement provides policy direction on matters of provincial interest related to land use planning and development. As a key part of Ontario's policy-led planning system, the Provincial Planning Statement sets the policy foundation for regulating the development and use of land province-wide, helping achieve the provincial goal of meeting the needs of a fast-growing province while enhancing the quality of life for all Ontarians.

The PPS is specific in its language but represents minimum standards for development in the Province. It is to be read in its entirety and to be read in conjunction with other Provincial plans. The PPS does not take precedence over other Provincial plans in the instance of a conflict. PPS policies may be complemented by locally generated policies regarding matters of municipal

interest, and it is understood that municipal official plans are the most important vehicle for the implementation of the PPS and comprehensive, long-term planning.

The Subject Lands have been brought into the Region of Peel and Town of Caledon Settlement Area by way of the 2022 Region of Peel Official Plan and recently adopted Future Caledon Official Plan (2024), which is designated for growth and development.

Chapter 2 of the PPS provides policy direction focusing on Building Homes and Sustaining Strong and Competitive Communities.

Planning for People and Homes

Section 2.1 of the PPS provides policy direction for municipalities on planning for growth and building complete communities. Planning authorities must base forecasts on Ontario Population Projections by the Ministry of Finance, with room for adjustments. Municipalities may continue using previous forecasts for land-use planning.

At the creation or update of an official plan, enough land must be available to meet projected needs for at least 20 years, but not more than 30 years. Planning for infrastructure and growth areas may extend beyond this time frame. Zoning orders by the Minister will add to projected needs and must be incorporated into future plans.

Planning authorities must ensure: a) A 15-year supply of land is available for residential development. b) At least a 3-year supply of land with servicing capacity for new development, including zoned lands and units in draft approved or registered plans.

In regions with both upper- and lower-tier municipalities, the lower-tier must align its land and unit supply with population allocations by the upper-tier municipality.

Planning should support diverse, accessible, and inclusive communities by: a) Accommodating a range of land uses, housing, transportation, employment, and public services (e.g., schools, childcare, long-term care, parks). b) Addressing barriers to accessibility for all ages and abilities. c) Enhancing social equity and quality of life for all people, including marginalized groups.

The development proposal will contribute to providing additional housing stock which varies in unit types to meet the housing supply need for the City of Caledon. The development proposal is also adding valuable public services such as a school and a park striving towards the vision of creating a complete community.

Housing

Section 2.2 of the PPS outlines policies relating to housing goals within municipalities. Planning authorities are tasked with ensuring a diverse range of housing options and densities to meet both current and future needs by:

- a. Setting and implementing targets for affordable housing for low- and moderate-income households. They must also coordinate with Service Managers to address a full spectrum of housing needs, including affordable options.
- b. Allowing and encouraging:
 - Housing that meets social, health, and economic needs, including for special needs and changing demographics.
 - Residential intensification, such as redeveloping underutilized commercial and institutional sites (e.g., shopping malls) for housing, and increasing housing options in already developed areas, which leads to a net increase in housing units.
- c. Promoting housing densities that use land, resources, infrastructure, and public facilities efficiently, while also supporting active transportation.
- d. Requiring transit-supportive development, prioritizing intensification, and considering air rights development near transit corridors and stations.

The Proposed Development provides a variety of unit types. The introduction of the unit mix which is predominantly ground-orientated, offers opportunities for both existing and future residents to live in this area and have their needs met at different stages of life. The Proposed Development will achieve an appropriate density that is transit and active transportation-supportive and will efficiently use land and resources.

Settlement Areas

Section 2.3.1.1 of the PPS notes that “*settlement areas shall be the focus of growth and development.*” Furthermore, section 2.3.1.2 provides that “*land use patterns within settlement areas shall be based on densities and a mix of land uses which:*

- a) *efficiently use land and resources;*
- b) *optimize existing and planned infrastructure and public service facilities;*
- c) *support active transportation;*
- d) *are transit-supportive, as appropriate; and*
- e) *are freight-supportive.*

Section 2.3.1.3 further states “*Planning authorities shall support general intensification and redevelopment to support the achievement of complete communities, including by planning for a range and mix of housing options and prioritizing planning and investment in the necessary infrastructure and public service facilities.*”

As previously noted, the Subject Lands are now located within a Settlement Area. The Proposed Development facilitates the development of an underutilized site within a Settlement Area, as supported by this policy objective. The Proposed Development represents an efficient use of land

and resources or infrastructure. As required in the Secondary Plan along proposed Collector roads sidewalks or a combination of sidewalk and multi-use trail will be provided on both sides of the road. Local Streets will also provide sidewalks on both sides.

Infrastructure and Public Facilities Overview

Chapter 3 provides policy direction on infrastructure and facilities to support growing communities.

Section 3.2 of the PPS outlines the need for safe, energy-efficient transportation systems that meet projected needs and support transit and active transportation. The proposed development is strategically near Mayfield and Chinguacousy Road, which are Urban Corridors with a Planned Major Transit Station Area on Hurontario Drive. The plan also includes access to recreational trails and bike lanes, further encouraging active transportation. A Transportation Study prepared by Crozier provides an analysis of the impact the proposed draft plan will have on the transportation infrastructure.

Section 3.6 of the PPS emphasizes efficient planning for sewage, water, and stormwater services to accommodate growth while protecting health and the environment. The proposed development will result in the installation of new municipal services as outlined in the supporting and detailed Alloo Tertiary Plan – Phase 1 Functional Servicing Report (September 2024) from Urbantech.

Section 3.9 outlines guidelines for the planning and development of new public spaces, recreational areas, parks, trails, and open spaces. Designing public streets, spaces, and facilities should ensure safety and accessibility for people of all ages and abilities, including pedestrians. This approach aims to foster social interaction, encourage active transportation, and enhance community connectivity. Ensuring the provision of a diverse and equitable range of publicly accessible built and natural settings for recreation, catering to the needs of individuals of all ages and abilities. This includes the thoughtful distribution of facilities such as parklands, public spaces, open areas, trails, linkages, and, where feasible, water-based resources. Acknowledging the significance of provincial parks, conservation reserves, and other protected areas, while striving to minimize any negative impacts on these sensitive environments.

This section serves as a framework for creating inclusive, sustainable, and well-connected public spaces that support the recreational and social needs of the community. The development proposal will provide sidewalks and easy access routes to existing NHS areas and parks. In doing this the development proposal will contribute to encouraging active transportation and a healthy sustainable community.

7.3 Region of Peel Official Plan (2022)

As announced by Paul Calandra on behalf of the Minister of Municipal Affairs and Housing on April 10, 2024, as of July 1, 2024, the Region's status as an upper-tier municipality with planning responsibilities under the Planning Act has been removed. This means that lower-tier municipalities will assume planning policy and approval responsibilities of the regional municipality, including primary responsibility for all planning in their geographies, except for

matters requiring provincial approval. Per section 70.13(2), the Region's official plan will be deemed to constitute the official plan of the Town of Caledon, and conformity will still be required until such time as Caledon amends Peel's Official Plan and approval is provided by the Province.

The Region of Peel Official Plan ("ROP") was adopted by Regional Council on April 28, 2022 and was adopted with modifications by the Ministry of Municipal Affairs and Housing on November 4, 2022. In conformity with the Growth Plan, the 2051 population forecast for the Region is 2,280,000 persons – including 300,000 expected in the Town of Caledon. Similarly, the employment forecast is 1,070,000 – including 125,000 jobs expected in the Town of Caledon.

The Subject Lands, together with adjacent lands, have been brought into the Region of Peel and Town of Caledon Settlement Area by way of the 2022 Region of Peel Official Plan and recently adopted Future Caledon Official Plan (2024).

The Subject Lands fall within the "Urban System" designation with a 2051 New Urban Area Overlay per Schedule E-1 of the ROP, as illustrated in **Figure 3: Region of Peel Official Plan Schedule E-1 Regional Structure**. Furthermore, the Subject Lands are designated as "Designated Greenfield Area" per Schedule E-3: Growth Plan Policy Areas.

Section 5.6.20 of the ROP Designated Greenfield Areas as key locations for accommodating new residential communities and employment areas up to 2051. These areas will be carefully planned in alignment with the Growth Plan's policy direction to develop complete communities that support active transportation and ensure the integration and sustained viability of transit services. This comprehensive planning approach will include diverse amenities, services, and employment opportunities to meet the daily needs of future residents. Local municipalities will implement these policies through detailed secondary planning. The Alloa Secondary Plan has been submitted and is currently under review.

Section 5.6.20.14 of the ROP states that "*Development of the 2051 New Urban Area will address the protection of cultural heritage and archaeological resources, support energy and emission reductions, develop healthy communities with neighbourhood centres and high-quality urban form and coordinate the location of retail and Employment Areas to multi-modal transportation options.*"

The supporting studies through the Alloa Secondary Plan and the supporting studies specific to the Subject Lands included in this submission package, addressed the protection of cultural heritage and archaeological resources, supports energy and emission reductions, and promoted the development of healthy communities.

7.4 Future Caledon Official Plan (2024)

The new Official Plan, Future Caledon, was adopted by Council on March 26, 2024 which will shape the future of development and growth in the Town for the next 30 years. As the Regional Municipality is not the approving authority, as a result of Bill 185 the new Official Plan will be approved by the Ministry of Municipal Affairs and Housing. The new Official Plan is not in effect yet, but approval is imminent from the Ministry of Municipal Affairs and Housing to also reflect the Provincial modifications to the Peel 2051 Official Plan through Bill 162. The Council-adopted Official Plan will thus be used to review the development application.

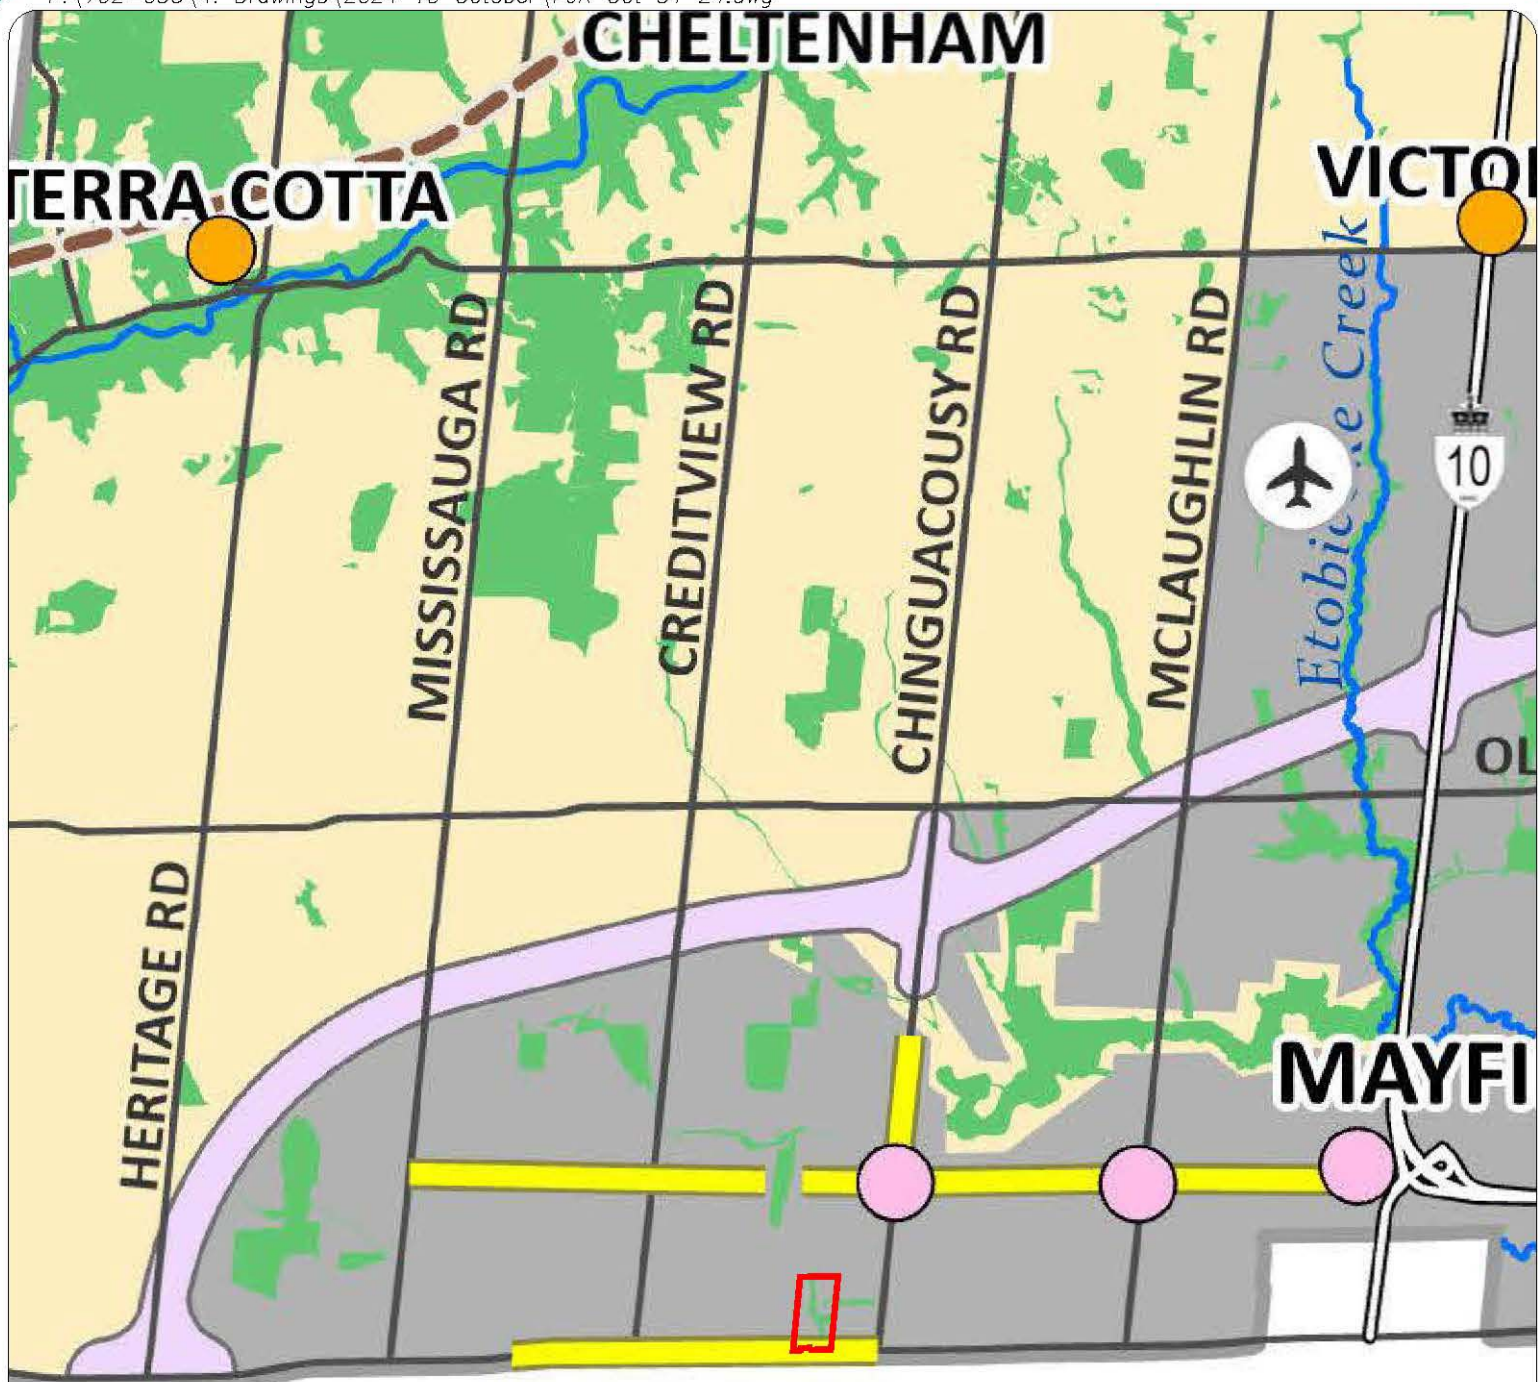

As illustrated in the attached **Figure 4: Schedule B1: Town Structure**, the Subject Lands are designated as part of the Urban Area in terms of the council adopted Official Plan. On **Schedule B2: Growth Management** attached as **Figure 5**, the subject lands are designated as part of the Designated Greenfield Area. These areas include lands within the settlement area, earmarked for accommodating anticipated growth within the 2051 horizon year of the Official Plan.

Growth Management

This chapter outlines the growth management policy to accommodate the Town's expected growth to 2051. Relevant policy includes:

- 4.1.4 *Population and employment growth will be:*
- a) *Focused in:*
 - i) *the Urban System;*
 - ii) *delineated built-up areas as shown on Schedule B2, Growth Management;*
 - iii) *strategic growth areas, including major transit station areas and locations with existing or planned transit, with a priority on higher order transit; and,*
 - iv) *areas with existing or planned public service facilities.*

The Subject Lands are identified within the Urban System and are considered a logical area for population growth in the Town, adjacent to existing or planned neighbourhoods. Within the Official Plan, Strategic growth areas are identified as major transit station areas, Urban Centres, and Neighbourhood Centres. A Neighbourhood Centre is identified just north of the Subject Lands (per Schedule B1 – Town Structure), at the Chinguacousy Road/Tim Manley Avenue intersection, directly adjacent to the Mayfield West Phase 2 Secondary Plan area.

| Urban System | Rural System |
|------------------------------------|---|
| Brampton-Caledon Airport | Village |
| Future Caledon GO Station | Hamlet |
| Downtown Bolton | Rural Employment Centre |
| Urban Centre | Palgrave Estate Residential Community |
| Neighbourhood Centre | Agricultural Area and Rural Lands |
| Urban Corridor | Natural Environment System |
| Knowledge and Innovation Corridor | Natural Features and Areas |
| Primary Major Transit Station Area | Other Map Elements |
| Urban Area | Caledon Trailway |
| | Planned Highway 413 Transportation Corridor |

General Policies

Section 5 of the Official Plan outlines policy regarding climate change adaptation and mitigation. Section 5.2 details policy on low carbon communities, including:

- 5.2.1 *To support built form and land use patterns that use land efficiently, reduce transportation emissions, and enable low carbon energy sources, the Town will:*
- a) *support the creation of compact, transit-supportive, and complete communities;*
 - b) *plan for a mix of land uses to provide convenient access, and reduced travel times, between housing, employment and shopping areas, and community amenities and services;*
 - c) *plan to meet or exceed the minimum intensification and density targets set by the Province, the Region of Peel Official Plan and this Plan; and,*
 - d) *plan a convenient mobility network, including transit, cycling and walking routes, to encourage a higher share of non-auto trips.*

The Proposed Draft Plan provides for a mix of residential density and unit types close to planned non-residential land uses. The Draft Plan will meet and exceed the Designated Greenfield Area density targets set by the Province, Region, and Town. The proposed transportation network discussed within the supporting Traffic Impact Study (Crozier 2024) describes the proposed road layout as a multimodal network that intends to reduce the reliance on vehicles, utilize a complete streets approach for safety in all modes, and provide greater accessibility to the future residents of the new neighbourhood created by the Subdivision.

Section 5.3 outlines policy regarding a transition to climate resilient development, including:

- 5.3.1 *To enhance the adaptive capacity of infrastructure, the Town will:*
- a) *apply the Town's Risk and Vulnerability Assessment to inform decision-making;*
 - b) *ensure that subwatershed planning informs the protection of water resource systems in the Town's new urban areas through secondary planning and subsequent development approvals;*
 - c) *undertake stormwater management planning that, among other things, assesses the impacts of extreme weather events and provides direction for green infrastructure and low impact development;*
 - d) *promote development patterns that conserve, integrate and enhance natural heritage system and water resource system features, areas, and functions;*
 - e) *align with the climate adaptation requirements of Infrastructure Canada's Investing in the Canada Infrastructure Program, as amended; and,*
 - f) *integrate green infrastructure and low impact development such as green roofs, and permeable surfaces into the design of infrastructure, where possible.*

In support of the conformity with the above policy, a Local Subwatershed Study (Crozier 2024) and a Scoped Servicing Study (Urbantech 2024) have been prepared in support of the Allosa Secondary Plan. Per the Study, the existing flood hazard mapping for the Subject Lands informs

the extent of the natural heritage system and informs the delineation of the Natural Environment System Area designation of the Secondary Plan which is then protected in the proposed draft plan of subdivision. The stormwater management strategy and the Natural Environment System Area designation together are intended to protect and enhance the natural heritage system. Green infrastructure and Low Impact Development measures will be considered and implemented where possible through development. Climate adaptation measures are considered in the Study, including potential impact on flood hazards, erosion, stormwater management, storm sewers, irrigation, roadways, site water balance, and environmental features.

All lands within the Natural Environment Area designation are intended to be zoned to prevent development and ensure the lands remain primarily in a natural state and/or be restored and enhanced, in accordance with the recommendations of the Local Subwatershed Plan.

- 5.3.3 *To reduce the urban heat island effect, the Town will:*
- a) *implement measures to protect, maintain or enhance the urban forest as set out in Section 5.5, Urban Forest; and,*
 - b) *promote green roofs and white roofs on residential, commercial, industrial, office and institutional rooftops.*

- 5.3.4 *The Town will encourage the use of large roof areas for clean energy generation, stormwater retention, heat reduction, and habitat creation.*

Section 5.4 of the Official Plan outlines policy regarding the Town of Caledon's Green Development Standards, including:

- 5.4.1 *The Town will establish Green Development Standards, to be implemented through the development application requirements in Chapter 27, Development Application Requirements, of this Plan.*

- 5.4.3 *The Green Development Standards will encourage all new development to exceed the energy performance criteria of the Ontario Building Code, as well as establishing zero-emissions building standards.*

All new development within the proposed subdivision will be required to implement the metrics outlined in the Town's Green Development Standards. A Green Development Standards assessment has been completed and forms part of the submission package.

Per Section 6.4.3, an archaeological assessment may also be required in support of development applications. A Stage 1-2 Archaeological Assessment was completed for the Subject Lands by Parslow Heritage Consultancy Inc. The property survey of Mayfield West I and II resulted in the identification of four archaeological sites (AkGx-728, AkGx-729, AkGx-735, and AkGx-736) and the property survey of Mayfield West III resulted in the identification of one archaeological site (AkGx-727).

The report made several recommendations based on the findings during the assessment. It is recommended that a Stage 3 assessment be done for Mayfield West I and II (AkGx-729, AkGx-735 and AkGx-736).

Section 7 of the Official Plan outlines policy regarding design in development, including:

- 7.2.3 *All development in the Urban System will:*
- a) *achieve a high quality public realm, architectural design, prioritize sustainability and contribute to a high quality of life; and,*
 - b) *adhere to the design policies in Part F, Urban System.*

A Community Design Plan has been prepared in support of the Secondary Plan by NAK to demonstrate conformity, dated July 2024. The proposed draft plan of subdivision will implement the design features as proposed. Part F, Urban System, of the Official Plan is discussed in further detail below.

- 7.2.4 *New communities will:*
- a) *be designed as complete communities through the creation of a framework for a compact design, mix of uses and densities, a fully connected grid network of streets and viable options for sustainable transportation modes;*
 - b) *demonstrate development of an integrated, connected and pedestrian focused public realm, including a variety of features intended to encourage the establishment of community such as gathering areas, enhanced streetscaping at connection nodes and community market areas;*
 - c) *align new streets in a grid pattern wherever possible to create pedestrian-scaled development blocks to ensure connectivity and better provide for active transportation;*
 - d) *be designed with community amenities such as institutional and community facilities, museums, historic sites, cultural centres, theatres, retail and/or commercial amenities within walking distance.*

The proposed draft plan illustrates a grid framework that is responsive to the existing and planned transportation network of the surrounding area, as well as Regional and Town roadways. It generally follows the conceptual network illustrated in Schedule C1 (*Town Wide Transportation Network*) and C4 (*2051 Town Wide Transit Network*) of the Future Caledon Official. This road network has been designed and analyzed through the supporting Transportation Study, prepared by Crozier (July 2024). Community design within this framework has been detailed through the Community Design Plan, prepared by NAK Design Strategies (July 2024).

In conformity with the above, and with Section 7.7.7 of the Official Plan, all lighting as far as possible in the proposed draft plan of subdivision will be designed to support safety and engagement in the streetscape, while minimizing impact on adjacent areas and the natural environment. The development proposal will provide sufficient land to accommodate streetscape elements, including street trees, seating, and electric vehicle charging infrastructure.

- 7.6.8 *To prioritize spaces that provide a sense of place, foster civic pride, and promote a sense of belonging, new communities will be designed to:*
- a) *provide diversity of land uses in the neighbourhood;*
 - b) *meet daily needs of residents and workers;*
 - c) *create space for healthy, diverse, and engaging neighbourhoods to thrive;*
 - d) *signify the importance of nodes, landmarks, routes, edges and open areas of the site and surrounds within a cohesive urban design approach;*
 - e) *activate public streets and open spaces through coordination of adjacent land uses and design of built form;*
 - f) *respect and enhance the public realm through building setbacks and boulevard design;*
 - g) *include rights-of-way as complete streets, where possible and in context to the overall streetscape or neighbourhood;*
 - h) *apply urban design best practices and a human-scale to commercial and industrial development; and,*
 - i) *integrate safety and crime prevention principles.*

A guiding principle of the Community Design Guidelines, prepared by NAK (July 2024), is the creation of pedestrian friendly streetscapes and placemaking. The Plan provides design direction for the development of the Subject Land. A Pedestrian Circulation Plan has been prepared by GSAI and forms part of the submission package.

Section 7.9 of the Official Plan outlines policy regarding built form, including:

7.9.1 *A low-rise building is generally no taller than four storeys in height.*

The built form in the proposed Draft Plan will consist of low-rise buildings. Low-rise residential buildings in the proposed draft plan of subdivision comprise single detached and, townhouse (street, rear lane, and back to back). These build forms are not expected to exceed three storeys in height.

Chapter 9 of the Official Plan outlines policy regarding housing in the Town of Caledon. Relevant policy includes:

- 9.2.6 *To support the diversification of the housing stock, the Town will work with the Region to:*
- b) *development containing more than 50 new residential units is encouraged to include 50 percent of a mix of two-bedroom units and three-bedroom units to achieve a balanced mix of unit types and sizes and support the creation of housing suitable for families;*
 - c) *encourage a mix of unit sizes in all new residential developments to accommodate diverse households; and,*
 - d) *consider flexible, innovative housing types and tenures.*

The development proposal meets the above policy requirements. The proposed unit mix and types will provide more than the required family units of 2 and 3 bedroom and accommodate a variety

of household needs in one neighbourhood. Please refer to Section 6.13 of this report relating to the Housing Assessment. A diverse range of housing, across unit types, and sizes, will increase the supply of missing middle housing options.

Chapter 11 of the Official Plan outlines policy regarding transportation, with the objective of ensuring high quality mobility options for existing and future residents and employees in Caledon.

11.2.4 The Town will prioritize transit and active transportation in all transportation system updates and expansions, and will consider reduced minimum parking requirements in appropriate areas to encourage transit and active transportation use

11.2.5 The Town will plan and develop a well-connected active transportation network that prioritizes high level of protection for pedestrian and cycling infrastructure, that is safe for all seasons and well-integrated with open space areas, other modes of transportation and the transportation systems of neighbouring municipalities.

11.2.6 The Town will prioritize transit investments within Urban Areas and maximize the use of existing and planned transit infrastructure in accordance with the policies of this Plan, with consideration of the existing and planned level of transit service and potential impacts on nearby neighbourhoods.

The transportation network within the proposed Draft Plan, has been planned in alignment with the Town's grid system and is discussed in the Traffic Impact Study prepared by Crozier (July 2024) for the Secondary Plan. The network is intended to implement the Town's complete streets design principles and support active and public transportation. The Draft Plan proposes one Collector Road, Black Horse Drive (north-south) connecting with Mafield Drive. A logical mostly grid-formation Local Road network is being proposed.

Section 12 of the Official Plan outlines policy regarding infrastructure, including:

12.3.3 Water and sewer services are to be planned, developed, and utilized in an efficient manner, and the Town may impose conditions on servicing, including placing time limits on approvals that reserve servicing capacity.

12.3.4 The Town will direct and accommodate expected growth or development in a manner that promotes the efficient use and optimization of existing municipal local and regional sewage services and municipal water services.

12.3.5 Sewer and water systems will be planned and commissioned in a manner that: a) can be sustained by the water resources upon which such services rely; b) prepares for the impacts of a changing climate; c) is feasible, and financially viable over the lifecycle; and, d) protects human health and safety and the natural environment.

A Scoped Servicing Study has been prepared in support of the Secondary Plan by Urbantech (July 2024). A letter of conformance has been submitted for the draft plan confirming that services can be made available as per the study done for the secondary plan. The Subject Lands can be serviced by extensions of existing or planned municipal infrastructure and will supply demand under all operating scenarios. Phase 1 of the Secondary Plan (where the Subject Lands are located) is sufficiently serviced by water and sanitary to support development. Climate change adaptation and Low Impact Development measures are considered in the Study.

The Scoped Servicing Study also includes a stormwater management strategy, which primarily identifies eleven (11) stormwater management pond facilities to service the Secondary Plan. The proposed draft plan currently accommodates one stormwater management pond, consistent with the secondary plan.

Natural Environment System, Parks and Open Space

Part D of the Official Plan outlines policy regarding the natural environment system within the Town of Caledon, where the objective is to promote a systems approach to identify, protect, and enhance the natural environment system. It is understood that development and site alteration is generally not permitted within the Natural Features and Areas, Supporting Features and Areas, Enhancement Areas, and Linkages identified in the Official Plan. These features are intended to be protected and enhanced through development.

A local Subwatershed Study has been completed in support of the Alloa Secondary Plan, and in accordance with a terms of reference coordinated with the Town. As requested, the Study characterizes existing environmental conditions and establishes natural hazards and boundaries. The study provides recommendations and establishes environmental targets to protect and enhance existing conditions through development, including through a climate change lens.

As illustrated in the Draft Plan of Subdivision an NHS compensation block is included in the draft plan. This was negotiated with the CVC for a pre-existing feature on the Subject Lands.

Urban System

Part F of the Official Plan outlines policy for development within the Town of Caledon's Urban System, where the majority of growth is planned to occur within the Town. Per Sections 21.1.1 and 21.3.1 of the Official Plan, all new community areas will undergo a secondary planning process before development can proceed, including within the Subject Lands.

Section 21.1.7 of the Official plan states that “*Applications for development within the designated greenfield area should only be submitted where a secondary plan is in effect, or the Town's Chief Planner deems an ongoing secondary planning process to be sufficiently advanced. A complete application will be required to include written confirmation to this effect.*”. In our professional opinion, the Secondary Plan has been sufficiently advanced, as it has been deemed complete and is underpinned by detailed technical studies. This degree of advancement reflects the thorough and

diligent process undertaken to ensure that all aspects of the plan conform to the necessary municipal and regional standards. The technical studies, which include environmental assessments, transportation analyses, and servicing studies, provide robust support to the Secondary Plan, confirming the feasibility and sustainability of future development.

The progression of the Secondary Plan, alongside the comprehensive technical studies that support it, establishes the readiness of the subdivision application. It demonstrates that key infrastructure, environmental, and community planning considerations have been thoroughly addressed, thereby minimizing potential risks or delays.

Thus, the submission of the draft plan of subdivision is both timely and appropriate. The existing planning framework, which already aligns with the Town of Caledon's strategic development objectives, ensures that the draft plan will integrate seamlessly into the broader planning process. As such, there will be no need for additional separate writing approval for the draft plan of subdivision, as all relevant planning criteria have been met under the current Secondary Plan structure. This approach not only promotes a streamlined development process but also upholds transparency and accountability, ensuring the project's alignment with municipal growth objectives.

Alloa Secondary Plan

The Alloa Landowners Group has initiated a privately-initiated Official Plan Amendment to establish a Secondary Plan, Alloa Secondary Plan, for the area in which the Subject Lands are located. The Secondary Plan area is bounded generally by Mayfield Road to the south, Chinguacousy Road to the east, and the Highway 413 Transportation Corridor to the north and west. The Secondary Plan is further intended to be advanced in two Phases (Phase 1 and Phase 2). The subject lands are located in Phase 1. The Official Plan Amendment was submitted on July 5, 2024 with the Phase 1 Tertiary Plan submitted on XX and is currently under review with the Town and external commenting agencies.

Through the Secondary Plan specific land use policies and objectives are provided on growth management, community design, the natural environment system, cultural heritage, mobility, climate resilience, and infrastructure to support the accommodation of forecasted population and employment growth to 2051. This will ensure that complete, healthy, and sustainable communities develop.

The Alloa Secondary Plan (see **Figure 6**) designates the subject lands as Neighbourhood Area and also indicates the general location of the stormwater management facility and Collector Road on the Subject Lands.

Residential Designations

The Neighbourhood Area designation constitutes a significant area of the Secondary Plan and is intended for a wide range of community land uses. This designation permits the following:

- a) residential uses;
- b) long term care homes and retirement homes;
- c) public service facilities including but not limited to places of worship, child care centres, libraries, schools, community centres and public recreation facilities; and,
- d) neighbourhood scale retail, commercial, personal service and professional service uses that are integrated within mixed-use buildings or on mixed-uses sites.

Three residential designations are permitted within the Neighbourhood Area. Low Density Residential permitting detached and semi-detached built forms and an approximate residential density of 30 units per net residential hectare. Medium Density Residential permitting townhouse built forms and an approximate net residential density of 60 units per hectare. Medium-High Density permitting stacked townhouse and apartment built forms and an approximate residential density of 150 units per net residential hectare.

The residential uses within this designation are intended to include a variety of housing options, including ownership and rental tenure, as well as secondary and accessory units and a range of sizes to meet various income levels. The subject lands are designated to be used for Medium Density Residential. The proposed street townhouses conform with the Secondary Plan land use vision for the Subject Lands. The proposed built form will also meet the density requirement of 60 units per hectare.

Community Amenities

The Secondary Plan identified conceptual locations for community amenities, including schools and parks. The Secondary Plan has not identified any community amenities to be accommodated on the Subject Lands. Community amenities that will serve this new neighbourhood will be located on surrounding lands in close proximity, ultimately creating complete communities.

Natural Environment System Area

The Natural Environment System Area designation identifies existing natural heritage features and connections within the Subject Lands. According to the Secondary Plan, this designation includes wetlands, woodlands, watercourses, stream corridors, and associated environmental buffers. This designation intends to identify the functional and connected natural heritage system and protect and enhance this system within the Subject Lands.

In the southwestern corner of the Subject Property is a NES compensation area.

AUGUST 23, 2024

7.5 Town of Caledon Zoning By-law

At the time of the Pre-Application Review Committee (PARC) Meeting held with Town staff (July 11, 2024), the Subject Lands were zoned “Small Agricultural Holdings (A3). Through the PARC meeting, it was understood that the Subject Lands would need to be re-zoned in order to facilitate development.

After the PARC meeting for the Subject Lands, the Town of Caledon consulted on a Town-initiated Draft Zoning By-law Amendment for Phase 1 of the Alloo Secondary Plan (Town File: RZ 2024-0008). The purpose of the Town-initiated Draft Zoning By-law Amendment for Phase 1 was to rezone Phase 1 from their existing, zones, into an appropriate residential mixed-use zone category to facilitate the future development of residential lots, residential mixed-use buildings, and commercial uses, as well as ensure the protection of environmental policy areas. A Public Meeting was first held for the proposed Amendment on April 25, 2024. Subsequent community information sessions were held with Town staff and members of the public through May and June 2024. The Amendment was approved at the June 25, 2024 Town Council meeting.

Per the Town-initiated Draft Zoning By-law Amendment, the Subject Lands are now zoned “Mixed Density Residential – Exception 686 (RMD-686)”, and “Environmental Policy Area 1 (EPA1)”. Additionally, two Holding Provisions have been applied (H39A; H39B). Holding Provision H39A shall not be lifted until, among other conditions, a secondary plan is approved for the applicable lands. Holding Provision H39B shall not be lifted until an Environmental Impact Study is submitted to the satisfaction of the Town which confirms the extent of the Natural Environment System.

The RMD zoning generally allows for a range of residential uses including single detached lots, dual frontage townhouses, rear lane townhouses and back-to-back townhouses. The EPA1 zoning generally provides environmental-related uses and environmental conservation.

The applicant is proposing to generally maintain the existing zones, with the exception of two minor revisions to the RMD-686 zone. These revisions are requested to facilitate a more efficient delivery of housing units. No revisions are proposed to the EPA1 zone.

A summary of the revisions is provided below:

- Permitted Encroachment into a required Front Yard for a bay, bow or box window with or without foundation or cold cellar is revised from 1 metre to two metres (provided a setback of 0.5 metres is maintained to the front lot line. This encroachment is consistent with existing front yard encroachments in the same zone (for covered or uncovered porch or balcony, terrace, canopy or portico, including stairs or steps).
- Permitted Encroachment into a required Rear Yard is revised to permit 3.5 metres (up to a maximum width of 60% of the lot) for a one-storey component of a main building. This standard previously restricted the same encroachment to one storey components of main buildings at lot depths less than 24 metres.

The proposed Zoning By-law Amendment will implement the proposed Draft Plan of Subdivision, while continuing to achieve the goals and objectives of the Town of Caledon Official Plan, and draft Alloa Secondary Plan.

8.0 Conclusion

Based on the information outlined in this Planning Justification Report and the findings identified in the supporting technical studies and reports, it is our opinion that the Zoning By-law Amendment and Draft Plan of Subdivision is justified and represents good planning for the following reasons:

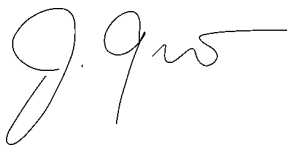

Based on the information outlined in this Planning Justification Report and the findings identified in the supporting technical studies and reports, it is our opinion that the proposed Zoning By-law Amendment and Draft Plan of Subdivision is justified and represents good planning for the following reasons:

1. Is consistent with the Provincial Planning Statement, 2024 as the development promotes efficient land use, and environmental protection while supporting growth and economic development. As the proposed development protects natural heritage features and manages environmental impacts through sustainable practices. Additionally, the development supports a mix of residential land uses and accessible spaces to support community vitality and economic opportunities.
2. It conforms to and promotes the policies of the Region of Peel Official Plan, providing for natural heritage protection and achieving the designated greenfield area objectives as the proposal comprises a diverse and compatible mix of residential densities and a compact form that supports sustainable growth.
3. The proposed development conforms to the broader policies of the Town of Caledon Official Plan as it contributes to the creation of a complete community with a range of housing options and community infrastructure while integrating and providing opportunities for various modes of transportation.
4. The proposed Zoning By-law Amendment and Draft Plan of Subdivision conform to the Alloa Phase 1 Tertiary Plan, Alloa Secondary Plan, and Future Caledon Official Plan by implementing the Neighbourhood Land Use designation, which encourages a balanced mix of residential uses, and by incorporating key community features such as an Elementary School, Neighbourhood Park, and Stormwater Management Pond. These elements fulfill the plan's goals for sustainable, livable, and well-connected neighborhoods. Additionally, the thoughtfully designed street network ensures efficient connectivity and supports active transportation, aligning with both the Secondary Plan and Official Plan's vision for a complete, accessible, and vibrant community.
5. The natural heritage system within the Subject Lands, has been characterized and will be protected or enhanced by creating Natural Heritage System Blocks and providing a 10-meter protective buffer which will ultimately be conveyed to public ownership.
6. The proposed multimodal transportation network reduces reliance on the personal vehicle and contributes to the development of complete communities.

7. The draft plan meets and/or exceeds the residential growth targets at all policy scales.
8. A broad range of housing types are permitted to provide options for future residents.
9. Adequate community services and facilities will be available to serve future residents as outlined in the Secondary Plan.
10. The draft plan will utilize extensions of existing transportation and servicing infrastructure from surrounding areas and continue an efficient pattern of development.

Respectfully submitted,

GLEN SCHNARR & ASSOCIATES INC.

APPENDIX

Appendix I: Draft Zoning By-law

**THE CORPORATION OF THE TOWN OF CALEDON
BY-LAW NO. 2024-_____**

Being a by-law to amend Comprehensive Zoning By-law 2006-50, as amended, with respect to Part of Lots 18 and 19, Concessions 3, West of Hurontario Street (Chinguacousy), Town of Caledon, Regional Municipality of Peel.

WHEREAS Section 34 of the Planning Act, as amended, permits the councils of local municipalities to pass zoning by-laws for prohibiting the use of land or the erecting, locating or using of buildings or structures for or except for such purposes as may be set out in the by-law;

AND WHEREAS the Council of The Corporation of the Town of Caledon considers it desirable to pass a zoning by-law to permit the use of Part of Lots 18 and 19, Concessions 3, West of Hurontario Street (Chinguacousy), Town of Caledon, Regional Municipality of Peel for mixed use residential purposes;

NOW THEREFORE the Council of The Corporation of the Town of Caledon enacts that By-law 2006-50 as amended, being the Comprehensive Zoning By-law for the Town of Caledon, shall be and is hereby amended as follows:

1. The following is added to Table 13.1

| Zone Prefix | Exception Number | Permitted Uses | Special Standards |
|--------------------|-------------------------|---|---|
| RMD | AAA | <ul style="list-style-type: none"> - <i>Accessory Uses</i> - <i>Adult Day Centre</i> - <i>Amusement Arcade</i> - <i>Animal Hospital</i> - <i>Apartment, Accessory</i> - <i>Art Gallery</i> - <i>Artist Studio and Gallery</i> - <i>Bakery</i> - <i>Bed and Breakfast Establishments</i> - <i>Building, Apartment</i> - <i>Building, Apartment, Senior Citizens</i> - <i>Building, Mixed Use</i> - <i>Business Office</i> - <i>Clinic</i> - <i>Community Centre</i> - <i>Conference Centre</i> - <i>Convenience Store</i> - <i>Crisis Care Facility</i> - <i>Cultural Centre</i> - <i>Day Care, Private Home</i> - <i>Day Nursery</i> | <p>1.0 DEFINITIONS</p> <p><i>Amenity Space</i> For the purposes of this zone, means an outdoor area used exclusively for the enjoyment of the outdoor environment and may include landscaping areas, patios, porches, privacy areas, balconies, terraces, decks and similar areas.</p> <p><i>Dwelling, Multiplex</i> For the purposes of this zone, means a residential building with up to eight units. In order to qualify as a Multiplex, at least one dwelling unit must be entirely or partially above another. A dwelling unit within a multiplex is not a principal dwelling that can contain an Additional Residential Unit.</p> <p><i>Dwelling, Stacked Townhouse</i> For the purposes of this zone, means a building containing four or more dwelling units in which each dwelling unit is divided both</p> |

| Zone Prefix | Exception Number | Permitted Uses | Special Standards |
