Hello Mr. Nethery - further to Mr. Sevelka's email, I would like to share my personal experience.

A couple of years ago, my husband and I arranged to visit the CBM Singhampton Quarry on a day when blasting was occurring.

We were standing with a CBM employee near the quarry entrance. We were not told how far away the blast was.

We definitely felt vibration from the blast through the ground.

In fairness to a full sharing of information, I ask that our experience be shared with all members of the ARCWG and anyone else who attended this particular meeting. We would also ask that this email be a formal part of the record of the ARCWG meetings.

Thank you,

Debra Wilson

We acknowledge that the land on which we gather is on the Treaty Lands and Territory of the Mississaugas of the Credit River (Missinnihe) First Nation. We acknowledge this territory is also home to the Anishnaabe, Huron-Wendat, Haudenosaunee, Ojibway, Chippewa and Metis peoples who cared for these lands and these waters and continue to do so today.
